- 2013 Graduate

TAFE Queensland

Cert III in EMS First Response

- 2013 Graduate

Emmaus Collage

Completion of year 12 Secondary School

- 2013 Graduate

SUMMARY /OBJECTIVE

Hey! I am Calvin. Thank you for taking the time to read and consider my application to join your team as an intern. I am excited to start this new chapter of my life and feel like a career in programming is where I belong. I have always loved computers and video games, and they have been a big part of my life that has given me a sense of community and purpose. I have tried a few different career paths; most recently, I was a qualified chef and part owner of an Indian Street food restaurant in West End. Even though the restaurant did not survive the pandemic, I was able to do what I enjoy most, which is working with good people and doing satisfying work alongside friends and family. Since the restaurant closed, I was encouraged to get into the Coding Academy, and I have been loving the challenge that programming presents and love learning more about computers and being able to problem-solve. I am looking forward to gaining an opportunity to discover exactly where I fit within the IT industry and grow as a programmer and person. Thank you again, and I look forward to any opportunity to learn alongside your business and teams.

TECH SKILLS

- **Languages**

- JavaScript
- Ruby
- HTML
- CSS
- SQL

- **Framework's**

- Ruby on Rails
- React

- **OS**

- Mac OS
- Windows
- Linux

- **Software**

- VS code
- Postman
- Git

- **Database**

- PostgreSQL
- MongoDB

KEY SKILLS

- Web developer
- Back end
- Interface design
- Unit testing
- Software testing
- Coding & troubleshooting
- Agile methodology

KEY PROJECTS

Second-hand clothes Marketplace

This project was built as a platform for users to upload an item for sale in a specific category and for other users to message them about their product.

- Ruby on Rails
- PostgreSQL
- Heroku
- Github

Portfolio Website

This Website has been created as a professional platform to introduce myself and my skills and knowledge.

- React
- Github
- Netlify

Jitter / API

This project is a very basic replica of twitter, using React useState, useReducer and global state.

- React
- Ruby on Rails (API)
- Github

Terminal App

This project is to demonstrate knowledge and understanding of Object Oriented Programming, the scope for the project is at least 3 features that are implementing ruby gems, classes, loops, methods, conditional control structures and error handling.

- Ruby
- Github
